

Carroll Residents:

Over the last few weeks I have worked with the company that produces all of the tax maps for the town, including the online GIS services, accessible through the town's website.

I was able to provide them with the coordinates of all of the fire hydrants in Twin Mt and Bretton Woods so they could update the maps. That map layer is now publicly viewable as well.

This was done to assist you with your homeowners insurance. Should your insurance provider ask about your proximity to fire hydrants when calculating your ISO rating, you will be able to see the nearest hydrants to your home or will be able to direct the insurance provider to the website.

Go to: <https://www.axisgis.com/CarrollNH/>
(or the link on the town's website) and click on the "Layers" tab on the left side of the screen. Then select "Hydrant Map".

We hope having this feature and information available will be helpful for those of you that ever need it.

Sincerely,

Lt. Nate Parks

Twin Mountain Fire Rescue
